PROFESSIONAL SUMMARY

Professional in a strategic transition to UX/UI Design, with a solid foundation in process analysis, document management and problem-solving built in complex corporate environments. I combine analytical thinking with user-centred research to design clear, functional digital solutions. Focused on end-to-end UX Research and UI Design projects, applying Design Thinking, information architecture and prototyping.

FEATURED PROJECTS

Camperoteca — *End-to-End UX/UI Project | 2025 - 2026*

Concept design of a digital platform for the camper community, aimed at simplifying the planning and management of the van conversion process through a people-centred experience.

- UX Research: survey (32 responses), 7 interviews and benchmark of 3 platforms; user personas and Customer Journey Map
- Information architecture, user flows, wireframes (low and high fidelity) and Design System
- Mobile UI Design and clickable prototype in Figma

Result: Clickable mobile prototype in Figma that turns the needs identified during research into a digital experience designed to simplify camper planning.

Riptide — *Conceptual UX/UI project in a team of 7 | 2026*

Browser extension that makes the water footprint of digital activity visible, without guilt or interruptions.

- UX Research: survey (55 responses), 9 interviews and analysis of 3 extensions; insight synthesis and HMW
- Value Proposition Canvas, Business Model Canvas, wireflow and low-fidelity wireframes

Result: A daily summary instead of pop-up alerts, because 47.3% of respondents rejected interruptions.

PROFESSIONAL EXPERIENCE

Customer Experience Specialist — Foundever Spain — Iberia Campaign | *Seville, Spain* | *2018 – 2024*

- Systematic identification of pain points and friction in the airline's digital processes, focused on real user experience
- Handling of complex incidents in high-demand environments, prioritising clarity and user-centred resolution
- Coordination with the legal department to prepare technical reports and documentation of critical processes
- Operation of corporate digital platforms and payment systems, spotting opportunities to improve flows

Customer Service — Hospitality | *Seville, Spain* | *2016 - 2018*

- Handling high-pressure situations with a focus on customer satisfaction
- Empathetic communication and real-time conflict resolution

Solutions Contract Management — IBM | *Rio de Janeiro, Brazil* | *2009 – 2015*

- Analysis of complex technology services contracts for public bodies and private companies, with one of Latin America's largest energy companies as the main account, identifying inconsistencies and proposing process improvements
- Document management for public tender processes, ensuring traceability and accuracy of critical information
- Mapping and optimisation of internal processes in collaboration with stakeholders from sales, after-sales, finance, legal and accounts receivable, translating client needs into clear requirements

EDUCATION

Business Administration – Estácio de Sá University | *Rio de Janeiro* | *2004 – 2008*

UX/UI Design Bootcamp — Neoland | *Seville* | *2025 – 2026*

Skills acquired: UX Research, Design Thinking, Information Architecture, User Flows, Wireframing, Prototyping, Responsive Design, Design Systems, Usability.

SKILLS & TOOLS

- UX Research: User Research, interviews, surveys, benchmarking, user personas, customer journey mapping, usability testing
- UX/UI Design: Information architecture, user flows, wireframing, prototyping, interaction design, design systems, responsive design, accessibility
- Tools: Figma, FigJam, Framer, Miro, Notion, Claude AI, ChatGPT, Emergent
